

Shahariya Alam Sabbir

Software Developer — Computer Science & Engineering Student

Cumilla, Bangladesh

ahanafsabbir83@gmail.com — 01729006015

LinkedIn — GitHub

Professional Summary

Computer Science and Engineering student and aspiring Software Developer with strong experience in full-stack web development, frontend engineering, backend development, and modern software technologies. Skilled in designing scalable web applications, developing RESTful systems, implementing authentication mechanisms, and building user-focused digital solutions. Experienced in team leadership, problem-solving, and software project management with a strong foundation in data structures, algorithms, database systems, and computer science fundamentals.

Technical Skills

Programming Languages: JavaScript, C++, Java, HTML5, CSS3

Frontend Development: React.js, React Native, Redux, Tailwind CSS, Bootstrap, Responsive Web Design, Component-Based Architecture

Backend Development: Node.js, Express.js, RESTful API Development, Server-Side Development, Authentication & Authorization, Role-Based Access Control

Database Management: MongoDB, Database Design, Data Modeling, CRUD Operations, Database Integration

Software Engineering Tools: Git, GitHub, Visual Studio Code, Postman, Figma, Vercel, Netlify, Notion, Linux

Computer Science Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), Software Development Life Cycle (SDLC), Problem Solving, Debugging

Development Practices: Version Control, Agile Collaboration, Software Design Principles, Team Collaboration, Project Management, Technical Documentation

Projects

REAL STATE (Real-Estate Junction) *Group Project — Team Leader & Backend Developer*

- Developed a full-stack real estate platform connecting property buyers, sellers, and agents.
- Designed a modern property management system with listing, searching, and communication features.
- Implemented property listing functionality with images, pricing, and detailed information.
- Developed advanced search and filtering options for efficient property discovery.
- Built saved properties, inquiry management, and user interaction features.
- Created agent dashboard, property management routes, and user profile systems.
- Implemented secure authentication with role-based access control for Admin, Agent, and User.
- Led the development team and managed project planning, implementation, and delivery within one month.

Boys Bride (Matrimony Web Application) *Personal Project — Full-Stack Developer*

- Developed a full-stack matrimony platform for finding compatible partners based on personal, educational, and family preferences.
- Created user profile management with detailed personal and academic information.
- Implemented search and filtering systems for compatible match discovery.
- Developed interest requests, connection management, and messaging functionality.
- Built member dashboard and profile customization features.
- Implemented secure authentication and authorization mechanisms.

- GitHub: github.com/Sabbir04/assignment1

Education

Bachelor of Science in Computer Science & Engineering

2023 – 2027

Bangladesh Army International University of Science and Technology (BAIUST)

Computer Science Foundation

- Strong understanding of Data Structures and Algorithms.
- Knowledge of Object-Oriented Programming (OOP) concepts.
- Understanding of Database Management Systems and software architecture.
- Familiar with Software Development Life Cycle (SDLC).
- Experience in developing maintainable and scalable software solutions.
- Knowledge of version control systems and collaborative software development practices.

Problem Solving

- CodeChef: 2 Star Rating
- LeetCode: 500+ Problems Solved
- Regular practice in Data Structures, Algorithms, and Competitive Programming.

Certifications & Courses

- Complete Web Development – Programming Hero (PHITRON)
- React Accelerator Program

Achievements

- Solved 500+ programming problems across Codeforces, CodeChef, and LeetCode.
- Served as Team Leader in a full-stack real estate management project.
- Successfully designed and developed multiple full-stack web applications.
- Strong interest in software engineering, backend systems, and scalable application development.

Languages

Bangla (Native) — English (Fluent)

Reference

Ziaur Rahman

Assistant Professor

Department of Computer Science & Engineering (CSE)

Bangladesh Army International University of Science and Technology (BAIUST)

Cumilla, Bangladesh
